Ajax chat for Joomla

Why the Plus version of the popular Chat for Joomla

JomfbChat +Plus version is an ajax chat for joomla improved in every part from the free version. The purchase is a ONE TIME COST for each domain where you install the chat. This product provides a rewarding experience thanks to:

- simplified installation,
- integration with important components (Jomsocial and CB),
- emoticons,
- audio,
- no advertising,
- tiketing through timely assistance.

From the purchase of the product the tiketing service is guaranteed for 1 month. The purchase of chat is a one-time cost. {xtypo_info}This Joomla chat component is delivered in native release for Joomla 1.5, and Joomla 2.5, the 2.5 version is also working for Joomla! 1.6 and 1.7. {/xtypo_info}

For the front end you can choose different languages (Italian, English, French, German, Spanish, Dutch, Hungarian, Greek) explicitly from the component configuration, while the back end is translated from the selected language pack in Joomla! Within available languages: Italian, English, Spanish and German.

To purchase JomfbChat + you simply have to register on 2punti.eu and add to cart the product following the procedure.

Once purchased the product you will have access to an area called "Download my products". You will also find, in the product folder, its tutorial.

In Joomla extensions said about our chat +Plus version:

{xtypo_quote}FINALLY!!!!!! One worth the buy!

Smooth install, smooth configuration.

Worked Out of the Box.

Integrates nicely with Jomsocial

1 suggestion would be tho to give back end more control over color of actual component as visible on front end, instead of requiring modification of the source to do so. {/xtypo_quote}

{xtypo_quote}Great Chat System

This is a great chat system. The installation is quick and easy. The backend options are very clear to understand. It auto recognizes the most popular community plugins. It would be great to have that option auto enable it but that is nothing major.

The price is very fair. However, it would be better if they include how to modify the chat software visually with the download and not a la carte. Luckily, I did not need to buy it but there are some Joomla users that are not familiar with how to edit those options.

I would recommend this extension to other users. I did look at their competitors and this one is (in my opinion) one of the best ones for the features and seamlessness it offers. {/xtypo_quote}

{xtypo_quote}Easy to install and work out of the box

I will give this product a 5 star rating. I have tried other chat programs before I come across this one. After installation I had problem with the sound due to other libraries on my Joomla site, I contacted the support and within 30 mins the issue was resolved. I will highly recommend this chat software to anyone who want to include chat functionality to their website. {/xtypo_quote}

{xtypo_quote}Picks Up Where others leave off!!!

After 2 years of wanting a chat for my Joomla/community builder site I have finally found one that works as advertised!! The chat bar is smooth, clean and full of options, and support was very quick to answer a question I had!!! {/xtypo_quote}

{xtypo_quote}Just fine

This chat works very well, and the support is reactiv. Very happy with that JomFacebookChat +Plus {/xtypo_quote}
