   border: 0 none;
   color: #FFFFFF;
   font-size: 10px;
   width:130px;
 height:24px;
   margin: 0;
   margin:0 0 0 2px;
}
a.newslink:hover{background:none!important}

a.newslink img{padding:0;border:0}
```

Dear {nome},

Have you enjoyed the component JoomlafacebookChat? Today you can have the PLUS version with emoticons, integration with Jomsocial e and Community Builder . The chat is also updated and improved in every part .

Joomla Facebook Chat functionality
Free

Plus

Ajax technology to update the chat

Jomsocial integration

Community Builder integration

Chat with users registered and logged in to the site

Manage users in separate windows

Avatar management integrated with Jomsocial and CB

Link to Jomsocial and CB users profiles

Possibility of limiting the display of available users in chat list to only users added as friends within Jomsocial and CB

Ability to set user status (Available, Busy, Invisible)

Emoticons with option to select image directly from the pop-up or write the shortcut (by staying with the mouse pointer on the images of emoticons a title is displayed corresponding to the keystroke shortcut)

Ability to set a descriptive message of the user's status

Managing configuration parameters for the update time of the messages and users list

Management of the configuration parameters for the language (English, Italian, ecc)

Ability to create files for other languages in an easy and fast mode

Managing settings for deleting old messages still in database

Support for the installation of new sets of emoticons

Otimization of the performance exchange messages

Advanced management of multi-user

No advertising

Deleted paths for configuration problems Joomla installations in subfolders (no longer requires the configuration of base tag)

Dynamic mode for online user status (green / gray) with timer or considering logged users always online

Improved management of conflicts with other javascript libraries

Features sounds for incoming messages and for new clients connected

Ability to go offline without logging out from the site

Support UTF-8

PHP 5.2.0 required

Audio Test
